

## RANGESTORM – LEARNING MANAGEMENT SYSTEM (LMS)

CREATE, MANAGE, DELIVER, PERFORM AND TRACK YOUR DIGITAL LEARNING.

Rangestorm is a young and vibrant software platform with a plethora of tools , that makes it a complete Learning Management System. The easy to use interface makes learning a fun, both for the instructor and the learner. The platform enables a comprehensive tracking of learner’s performance with detailed reports. Course content can be created as a mix of text, audio and video.

The system can be hosted either on premises or over a cloud as per user’s requirements.

You also get to choose from a variety of commercial models ranging from capex based charging to subscription based system, depending on your needs.

### KEY HIGHLIGHTS

1

#### Course Design

Design your course with a mix of audio, video and text.

2

#### Gamification

Transform your learning into edutainment and motivate through rewards.

3

#### Integrated Labs

Enhance your learning with hands-on intergrated labs

4

#### Record and Share

Record your live classroom and access anytime anywhere.

5

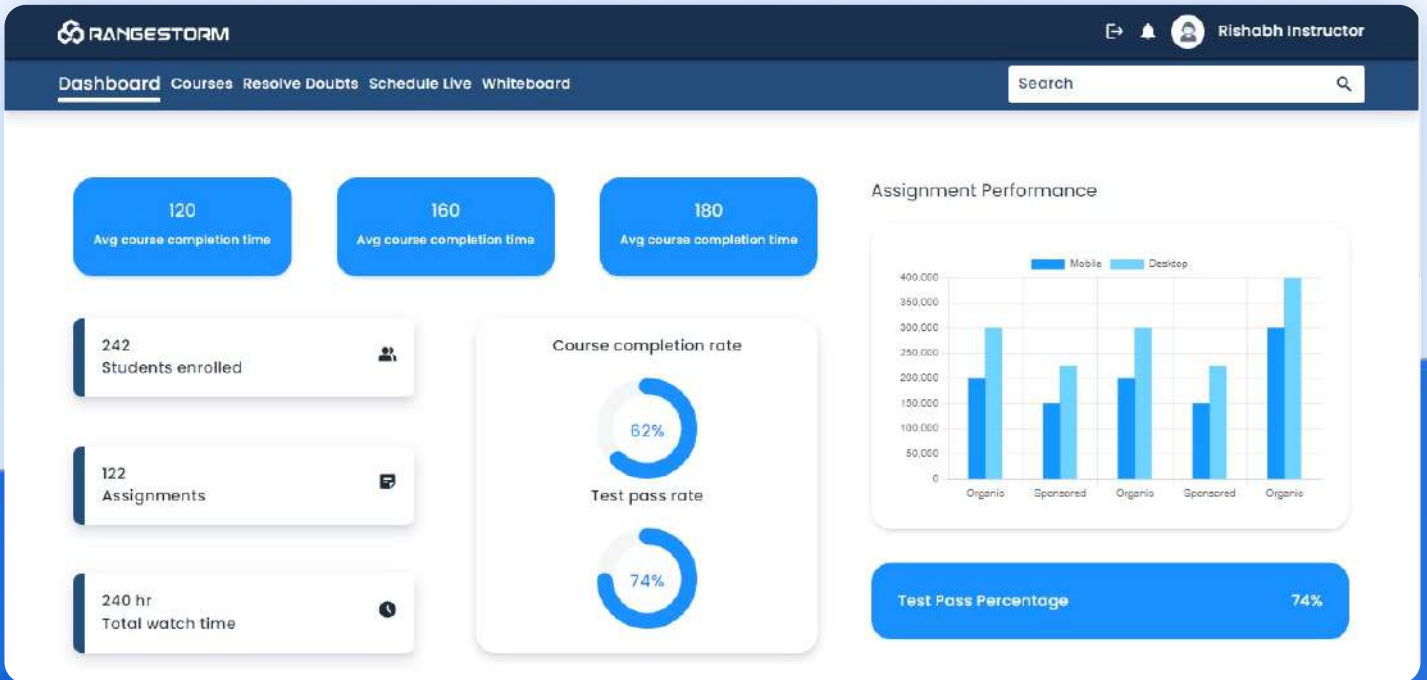

#### Whiteboard

Withboarding to provide the feel of classroom.

6

#### Live Classroom And Collaboration

Start learning from anywhere and collaboration with student and trainer with live responses.

Rangestorm LMS can be integrated with virtual or real IT / Networking infrastructure to create on line labs for the learners to gain hand-on experience. The learners can work on actual IT & networking systems from remote locations.
